

**Anne de Suède**

I am a french/swedish artist that has been active since 95 as an artist. Since 97, I have been exposing all over the world, first in Sweden and Europe, but now even in Dubai and the Us. Have studied at the university in Stockholm, Philosophy, History of Art and gone to the Folkuniversity to learn painting, drawing, photo and sculpture.

Just now in Menton I am going to a stone sculpting.

**The project is amazing for me.**

I have for many years been working for the climate change and the last year I have been doing works for the sea and the animals more than ever. To be able to work with other talent artists is of course a challenge. And maybe the thing that I always am longing for, working in group. As an artist a lot is very lonely and to try to do an exhibition with others would be so nice. I hope that my works with a lot of colors and lot of things can be interesting for the audience. I would like to do a big sculpture with things that will come to the beach on next storm. Picking up wood from the forests coming above in The Roya valley, iron, plastic etc and do it to a nice piece . I want to do it authentic but with a little of my colors.
